

New advanced portable heater can cut your heating bill up to 50%

Heats a large room in minutes with even heat wall to wall and floor to ceiling

Does not get hot, cannot start a fire and will not reduce humidity or oxygen

By John Whitehead, Media Services

A remarkable new advanced quartz infrared portable heater, the EdenPURE®, can cut your heating bills by up to 50%.

The EdenPURE® can pay for itself in a matter of weeks and then start putting a great deal of extra money in your pocket after that.

And that's just the start of the benefits for the new EdenPURE® Quartz Infrared Portable Heater.

A major cause of residential fires in the United States is portable heaters. But the EdenPURE® cannot cause a fire. That is because the quartz infrared heating element never gets to a temperature that can ignite anything.

The outside of the EdenPURE® only gets warm to the touch so that it will not burn children or pets. Pets can sleep on it when it is operating without harm.

The EdenPURE® will also make you healthier. That is because, unlike other heating sources, it will not reduce humidity or oxygen in the room. Typical heating sources reduce humidity which dries out your sinuses, makes you more susceptible to disease and makes your skin dry. With other heating sources, you'll notice that you get sleepy when the heat comes on because they are burning up oxygen.

The advanced space-age EdenPURE® Quartz Infrared Portable Heater also heats the room evenly, wall-to-wall and floor-to-ceiling. Other heating sources heat rooms unevenly with most of the heat concentrated high in the room and to the center of the room. And, as you know, portable heaters only heat an area a few feet around the heater. With the EdenPURE®, the temperature will not vary in any part of the room.

Unlike other heating sources, the EdenPURE® cannot put poisonous carbon monoxide into a room or any type of fumes or any type of harmful radiation.

For more details on the amazing EdenPURE® Quartz Infrared Portable Heater, here is my interview with Julius Toth, Director of Product Development for BioTech Research®.

Q. What is the origin of this amazing heating element in the EdenPURE®?

A. This advanced heating element was discovered accidentally by a man named John Jones. He had a large old farmhouse that was impossible to heat. Jones had a coal furnace in his basement. Jones placed a sheet of cured copper near the furnace to store it. Cured copper is a type of copper that goes through an extensive heating process to give it special properties.

After the fire went out in the coal furnace, Jones noticed that the sheet of copper was heating his entire basement evenly, even though the furnace was no longer putting out heat. He also was amazed as to how long the heat stayed in the copper and continued to warm the room.

Jones was so taken back by this that he started to experiment. He formed a company to develop a heating source

Never be cold again

Cannot start a fire; a child or animal can touch or sit on it without harm

out of this cured copper. But Jones had a number of children and he did not want a heating source that would cause a fire or create other hazardous situations like creating carbon monoxide or radiation. He also did not want his children to get burned.

To make a long story short, through a great deal of research and development, Jones developed a heating source that utilized commercial infrared quartz tubes.

Q. What advantages does infrared quartz tube heating source have over other heating source products?

A. John Jones designed his heating source around the three most important consumer benefits: economy, comfort, and safety. The final development of this infrared quartz heat source cannot be matched by any other heating system in the world.

In the EdenPURE® system, electricity is used to generate infrared light which, in turn, creates a very safe heat. Infrared is the safest form of heat because it does not create carbon monoxide or harmful radiation. And, most importantly, infrared heat does not reach a burning temperature.

After a great deal of research and development, very efficient infrared heat chambers were developed that utilize three unique patented solid copper heat exchangers in one EdenPURE® heater. Over 5 years of research, development and real life field testing stand behind this heat source. It has now worked in residential and commercial applications worldwide for over 25 years.

Q. Why is it that this quartz infrared heating source uses less energy to create heat than other sources?

A. Actually, there is more than one reason. One of the primary reasons is that heat at combustion level, which is what all other heat sources use, causes the heat to instantly rise to the ceiling. Therefore, the heat is not evenly distributed, causing a very inefficient and uncomfortable heat source.

The EdenPURE® Quartz Infrared Portable Heater does not use burning heat. Once the heat exchanger absorbs the infrared heat, it exhales the heat into the living area which is carried by the existing humidity in the air. This causes the heat to travel rapidly and evenly throughout a room.

In actual studies, photos using infrared lighting demonstrated that the heat was almost perfectly even from floor-to-ceiling and wall-to-wall. The EdenPURE® Quartz Infrared efficiency is based on the distribution of energized air, not on just fan movement. This heat is coined as "soft heat" due to how comfortable it is.

Q. What are the other disadvantages of combustion heat sources?

A. Heat sources that are above the burning level have many unhealthy side effects. One of these is that it creates dry, irritating indoor air. It also burns a great deal of oxygen in the air. If you remember, when you sit in front of a fireplace or a portable heater or close to a heat source, you will remember yawning. This is because you are not getting enough oxygen.

This dry irritating heat and lack of oxygen dries out sinuses and mucus in the throat, and makes people susceptible to disease. The lack of oxygen causes fatigue.

Also, many combustible

How it works:

heat sources produce carbon monoxide, static cling, and some produce radiation.

Q. So you're saying that children or pets can come up to this unit and touch it and not be harmed?

A. That is absolutely correct. As a matter of fact, pets are actually drawn to this heat because it is a natural source of heat, just like the sun heats the earth. Animals are much more instinctive than humans. This heat not only heats the air, but it also heats the objects in the room. It is a perfectly balanced heat.

Q. How can a person cut their heating bill by up to 50% with the EdenPURE®?

A. First, the EdenPURE® uses less energy to create heat than other sources, but that is just part of why it will cut a person's heating bill. The EdenPURE® will heat a room in minutes. Therefore, you can turn the heat down in your house to as low as 50 degrees, but the room you are occupying, which has the EdenPURE®, will be warm and comfortable. The EdenPURE® is portable. When you move to another room, it will quickly heat that room also. This can drastically cut heating bills, in some instances, by up to 50%.

Q. I also understand that the EdenPURE® produces clean fresh air without furnace filters. How can it do that?

A. A furnace generates a lot of dust due to the combustion. By lowering the furnace temperature, you are using your furnace less and therefore reducing the requirement for the furnace filters. Also, when there's no combustion, there are no harmful fumes.

Q. So, the EdenPURE® is totally safe to use?

A. It absolutely is. The EdenPURE® has zero clearance, which means you can push it up against the wall or

furniture without risk of fire. Tests prove the unit does not transmit any energy into the atmosphere that will burn or harm anyone regardless of distance between the person and the EdenPURE®.

The EdenPURE® will pay for itself in weeks. It will put a great deal of extra money in a users pocket. Because of today's spiraling gas, oil, propane, and other energy costs, the EdenPURE® will provide even greater savings as the time goes by.

The EdenPURE® Model

1000 can comfortably heat a room up to 1,000 square feet.

End of Interview.

Readers who wish can obtain the EdenPURE® Quartz Infrared Portable Heater at a \$75 discount if they order in the next 10 days. Please see the Special Readers Discount Coupon on this page. For those readers ordering after 10 days from the date of this publication, we reserve the right to either accept or reject order requests at the discounted price.

SPECIAL READER'S DISCOUNT COUPON

The price of the EdenPURE® Model 1000 is \$472 plus \$27 shipping and handling for a total of \$499 delivered. People reading this publication get a \$75 discount with this coupon and pay only \$397 delivered for the Model 1000 if you order within 10 days. The EdenPURE® comes in the decorator color of black with burl wood accent which goes with any decor. There is a strict limit of 3 units at the discount price - no exceptions please.

Check below how many units:

- Model 1000, number _____
- To order by phone, call TOLL FREE 1-800-284-9557 Ext. EPH796. Place your order by using your credit card. Operators are on duty 24 hours, 7 days.
- To order online log on to www.biotechresearch.com
- To order by mail, by check or credit card, fill out and mail in this coupon.

This product carries a 60-day satisfaction guarantee. If you are not totally satisfied, your purchase price will be refunded. No questions asked. There is also a three year warranty.

NAME _____

ADDRESS _____

CITY _____ STATE _____ ZIP CODE _____

Check below to get discount:

- I am ordering within 10 days of the date of this publication, therefore I get a \$75 discount and my price is only \$397 for Model 1000.
- I am ordering past 10 days of the date of this publication, therefore I pay full price of \$499 for Model 1000.

Enclosed is \$ _____ in: Cash Check Money Order (Make check payable to BioTech Research) or charge my:

VISA MasterCard Am. Exp./Optima Discover/Novus
